

## CDH Vertical Plate Clamp

### Feature of CDH Vertical Plate Clamp

1. Standard design clamp for vertical lifting of steel plates and steel structures. The spring-loaded tighttending lock mechanism assures a positive initial clampingforce.
2. Clamp are equipped with a safety mechanism, ensuring the clamp does not slip when lifting force is applied and when load is bing lowered.
3. The clmap is locked in closed as well as in open position.
4. High frquency quenching of die forged special alloy steels gives greater durability to the cam.
